Policy – Safety for Field Trips

As RTD Math Academy is an online learning program, all field trips will be conducted virtually. Educational virtual field trips provide valuable learning opportunities, especially when designed to supplement and enhance school programs. The Board expects that the principal and staff will ensure a respectful learning environment for any virtual field trips. Care shall be taken to ensure that such activities are organized to maximize educational benefit and ensure that students feel that they are in a safe, and caring learning environment.
